DOOSAN

Maximum power: 137 HP Operating weight: 15 - 17 t Max. bucket capacity: 0.76 m³

Doosan Group – Building your tomorrow today

■ Be part of the great Doosan family

The Doosan Group - founded in 1896 and headquartered in Seoul, South Korea - is one of the fastest-growing companies in the world:

- With more than 43,100 employees in 34 countries, we are a major player in a variety of industries worldwide
- We are a global leader in the Infrastructure Support Business (ISB), with 56 subsidiaries and 3,700 distributors worldwide
- Dramatic growth over the past decade, with 23% average annual revenue growth since 2000 and rising from €2.4 billion in 1998 to €18.0 billion in 2011

□ Doosan Group – a top player worldwide

Doosan Engines

• World N° 2 in medium-speed marine diesel engines

Doosan Engineering & Construction

A pioneering leader in construction of residential • World N° 1 in desalination plant construction and public buildings, civil works and industrial

• World N° 1 chemical process equipment products

Doosan Heavy Industries & Construction

- World N° 1 in heat recovery steam generator market
- . World N° 1 in mould & tool steel

· World N° 3 in crankshafts

Doosan Infracore

- · Among the world's Top 5 manufacturers of construction equipment
- World N° 1 in compact loaders
- · World N° 1 in attachments
- World N° 1 in portable air compressors

□ Doosan Infracore Construction Equipment

Creating construction equipment for over 40 years

For over 40 years, we've been building a global production and business network to become one of the world's foremost construction equipment manufacturers.

A solid partner, close to you

A truly global player in every respect, we have large-scale factories, sales subsidiaries and dealers all over the world.

Doosan facilities in Europe

From machine manufacturer... to full solution provider

To ensure the highest trade-in and residual values, our parts and service support professionals maintain the performance, productivity and reliability that you expect of our products throughout their lifetime.

■ Ask your dealer for a full range of services designed especially for you!

As your local specialist, your dealer ensures that you receive the maximum benefit from our integrated package. Plan ahead to ensure the success of your equipment!

Raise profits, productivity & fuel efficiency

► High productivity & low cost of ownership

Delivers higher productivity & reduced fuel consumption in an efficient & comfortable work environment. Made for tough jobs, the DX16oW-5 is featuring a reinforced chassis along with heavy duty axles to increase dynamic &

static axle load.

pivot points and reinforced heavy-duty arm and boom to withstand high-impact materials. Large, robust boom and arm cylinders for smooth, powerful operation. Advanced pin & bushing technology.

> **Productivity:** Highest in this class in the market for digging power, lifting capacities & traction.

⊗ Safety: Rear camera as standard and side camera as option, large side mirrors, powerful lighting, anti-slip steps. Guard rails on upper structure.

> **Overline** Various applications: Highest hydraulic capacity in its class in the market with 2 × 200 l/m. For any attachments & work you'll get this extra power you need.

> > **⊙** Connectivity: Core TMS as standard helps monitor the machine's condition remotely and plan maintenance.

⊙ Front axle oscillation: For more comfort. Can be automatically or manually activated for better lifting or digging. DX16oW-5 is fitted with heavy duty axles to increase dynamic & static axle load.

© Comfort: One of the most spacious cabs in the market, with low noise & vibration levels and excellent all-round visibility. Extra-large door for easy access. Fully adjustable heated air suspension seat, air conditioning with climate control as standard.

© Controllability: Exclusive jog shuttle switch, 4 work & 4 power modes, proportional control, user-friendly 7" TFT LCD colour monitor. 2 speeds (high, low + creep) with cruise control and 3 front axle oscillation lock modes (On/Off/Auto)

- © Efficient fuel management: The evolution of the Doosan DLo6 to DLo6P allows up to 5% fuel saving. A new SPC (Smart Power Control) system, combined with settable engine shut-off & auto-idle, provides an additional reduction of up to 5%.
 - © Electric fan clutch: For optimum cooling, fan speed is controlled electronically by a fan clutch, resulting in lower fan noise and better fuel efficiency.
- Advanced filtration: Highest efficiency filters & cleaners remove water, dust & particles to protect your investment optimally.

Stable & comfortable: Features longest wheel base on the market for stability and a driving performance that makes the whole difference. And all this while offering an outstanding turning radius.

Efficient & safe: Excellent ground clearance for better protection in rough terrain.

Top performance and fuel efficiency

■ The power to raise productivity

The DX16oW-5 takes even the heaviest tasks in its stride with efficient, dependable performance that saves you time and money:

- Improved hydraulic system uses the engine's power more effectively, maximising pump output and offering more comfort, smoothness and accuracy
- Increased digging power, lifting capacities and traction force combine for performance you can rely on, day after day
- · Greater fuel efficiency means you can keep costs down and reduce environmental impact

OPTIMISED POWER MANAGEMENT

The DX16oW-5 is equipped with a Doosan engine. Famous for excellent fuel efficiency, reliability and long service life, it combines exceptional power output and high torque at low revs. Engine is fitted with common rail fuel injection combined with a wastegate turbocharger, which increases the density of the air, enabling the engine to produce more power.

Selective Catalytic Reduction (SCR) technology combined with a Diesel Oxidation Catalyst (DOC) ensures compliance with Stage IV regulations. As there is no need for a particulate filter, there is no need for regeneration.

If the engine is the heart of the excavator, the e-EPOS is its brain - providing a perfectly synchronised communication link between the engine's ECU (Electronic Control Unit) and the hydraulic system. A CAN (Controller Area Network) system enables a constant flow of information between engine and hydraulic system, so that power is delivered exactly as needed.

EFFICIENT FUEL MANAGEMENT

- Choice between 4 power modes and 4 working modes guarantees optimum performance in all conditions
- SPC (Smart Power Control): reduces engine RPM during low load demand
 ensures pump torque control, thus ensuring fuel efficiency and low emissions
- Engine auto-shut-off: shuts down the engine after the machine has been idling for a specified time
- Electronic control of fuel consumption optimises efficiency
- Auto-idle function saves fuel
- Eco guidance in real-time: eco gauge provides information about fuel consumption relative to machine performance in real-time. By trying to keep the right-hand LED bar from rising, the operator can teach himself how to save fuel and work efficiently
- For optimum cooling, fan speed is controlled by a electrical viscous fan clutch resulting in a lower fan noise & better fuel efficiency

Operating in comfort

■ The ideal workspace – designed around you

The DX16oW-5 is designed to provide you with the best possible working conditions. The pressurised cab is ISO-certified for your safety. Its spacious interior offers a fully adjustable, heated air suspension seat. Comfortably seated, you have easy access to several storage compartments and a clear all-round view of the worksite. Noise and vibration levels have been reduced, while air conditioning and automatic climate control allow you to keep working for hours on end without feeling tired.

Best-in-class operator environment

Doosan Wheeled Excavators are powered by industry-leading engines that save on fuel and meet the latest Stage IV European regulations in addition to all noise regulations.

The low levels of cab vibration and noise provide exceptional operator comfort - and the cab air is filtered to ensure a healthy work environment.

Comfortable & safe workspace

Doosan offers one of the most spacious cabs in the market. The cab also features Roll Over Protective Structure (ROPS) - meeting the ISO 12117-2 standard - in the event the machine rolls over.

Fully adjustable steering column

The easily adjustable and narrow steering column ensures optimal visibility.

Heated air suspension seat (standard)

In addition to being adjustable and providing lumbar support, the seat has an air suspension system to reduce vibrations. It also features a seat heating system (activated at the touch of a button). A storage box has been placed under the seat for extra convenience.

Air conditioning with climate control

The operator can choose from 5 different modes to regulate the airflow, while the system adjusts the air temperature & fan speed to maintain the operator's selected temperature. A recirculated air function is also available.

MP3/USB radio

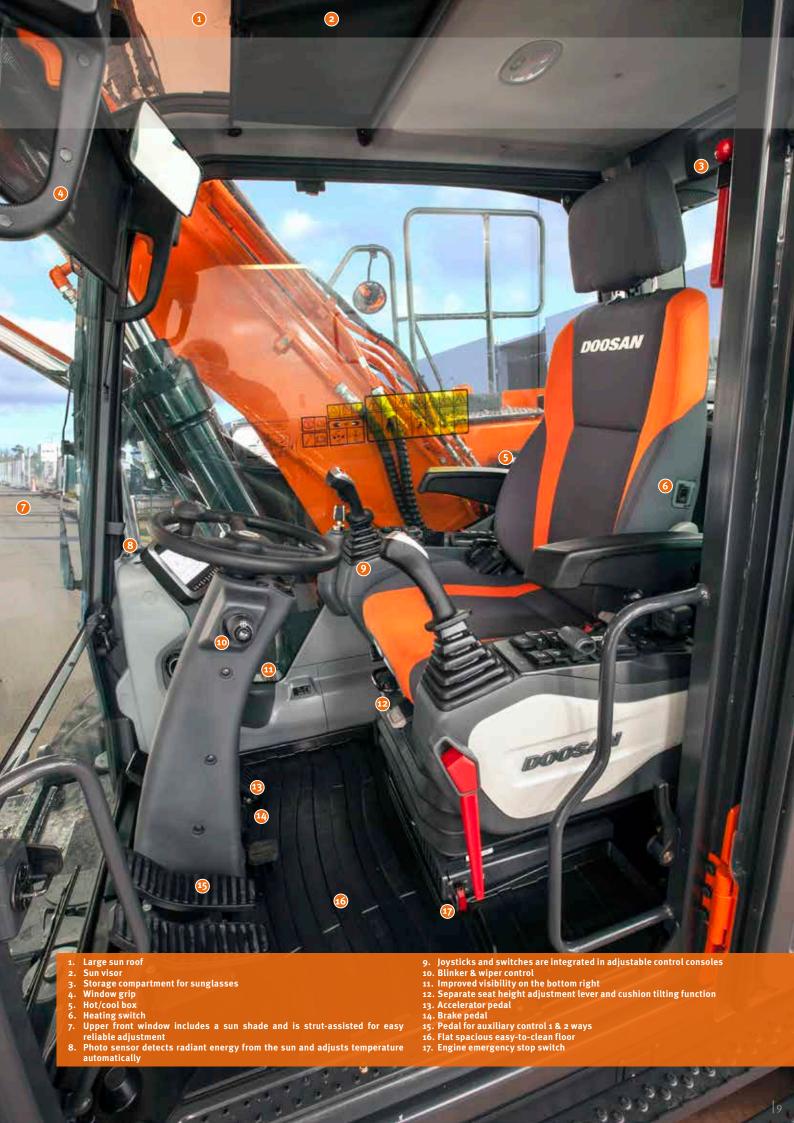

MP3 player (MP3/USB radio with CD player optional).

Storage space

The new cab contains 7 storage compartments including one hot/cool box (linked to the HVAC system).

CabSus mount

The cab's new suspension system (CabSus mount) dampens high vibrations and provides outstanding protection against impact. The system absorbs shocks and vibrations much more effectively than a conventional viscous suspension system.

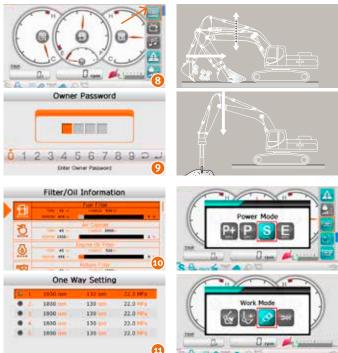

Total control in all simplicity

■ The highest standards of efficiency at your fingertips

The advanced & user-friendly technologies are just some of the many advantages of this new generation. The ergonomic controls and the easy-to-view colour monitor place the machine firmly in your hands.

- The new multi-function 7" TFT LCD monitor displays a comprehensive range of useful technical information, allowing you to check the machine's status and settings at a glance
- Highly sensitive & low-effort joysticks and clear convenient controls enable you to work safely, smoothly & confidently with minimum effort for increased comfort, efficiency and production
- Doosan's unique jog shuttle switch gives you easy, precise control over all machine functions
- Proportional auxiliary flow means precision control, smoothness & efficiency when using attachments

TFT LCD colour monitor panel

The upgraded 7" Thin-Film-Transistor (TFT is a technology that improves image quality) LCD panel features a day and night display. The user-friendly monitor gives full access to machine settings and maintenance data. Any abnormality is clearly displayed on the screen, allowing you to work safely and confidently with an accurate overview of all conditions. All functions are totally controllable, directly via the screen or using the exclusive jog shuttle switch.

- ${\tt 1.} \quad {\tt Fuel \, consumption \, level: \, current, \, total \, \& \, daily \, average \, fuel \, consumption}$
- 2. Fuel level
- 3. AdBlue® level
- 4. Eco symbol: changes colour when operating conditions change (idle, normal or loading)
- 5. Eco gauge: shows the average fuel efficiency
- 6. Engine coolant and hydraulic oil temperatures
- 7. Warning symbols
- 8. New shortcut menu: displayed on the right for rapid access to main functions
- 9. Optional anti-theft password-controlled starting
- ${\tt 10.}$ Oil filter information
- 11. Attachment management: stores up to 10 different attachment presets, enabling the operator to set hydraulic flow & pressure according to his needs

Dynamic power management

- Automatic travel speed function
- Activating the power boost control system increases digging force by 10%
- A one-touch deceleration button immediately reduces engine speed to low or idle
- Auto-idling starts 4 seconds after all controls are returned to neutral decreasing fuel consumption and reducing noise levels in the cab

Intelligent floating boom mode (optional)

The "intelligent floating boom" function allows the boom to move up & down freely according to the application:

- Hydraulic breaker setting: during boom down operation, the boom moves down freely under its own weight, which reduces vibration and stress on the machine & increases breaker life
- Fully floating mode: during boom down selection, the boom is allowed to rise & fall as required while the bucket is drawn across the ground

4 Work modes & 4 Power modes

Deliver the needed power according to your specific application while minimising fuel consumption:

- 1-way mode, 2-way mode, Digging mode and Lifting mode
- Power-plus mode, Power mode, Standard mode, Economy mode

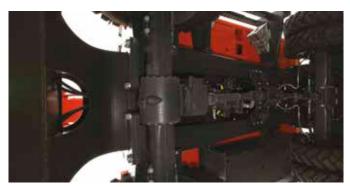

Reliability, the habit of a lifetime

Designed for long-term all-round heavy-duty performance

In your profession, you need equipment you can depend on. At Doosan, we use highly specialised design and analysis tools to make sure our machines are as robust and durable as can be. Our materials and structures undergo stringent testing for strength and resilience under the most extreme conditions.

And we continually manufacture the most durable machines to ensure lower cost of ownership.

Undercarriage durability

A rigid, welded frame provides excellent durability. Efficient routing of hydraulic lines, transmission and rear differential protection and specific heavy-duty axles designed for the DX160W-5 make the undercarriage perfect for wheeled excavator applications. An oscillating axle lock is available.

New drive line concept

The new travel motor and powershift transmission control in the drive line provide comfortable travel due to increased smoothness, improved hydraulic retarding and improved gear shifting.

Advanced disc brake system

The new improved system allows a more efficient braking of the machine. This eliminates the rocking effect associated with working on wheels. The ZF axles are designed for low maintenance, and the oil change intervals have been increased to 2000 hours, further reducing owning and operating costs.

Heavy-duty axles

Specific to the DX16oW-5, the front axle offers wide oscillating and steering angles. The transmission is mounted directly on the rear axle for protection and optimum ground clearance.

Advanced filtration

- Fuel filters & water separator: a filter-type high-performance water separator effectively captures moisture in the fuel, reducing impurities and helping minimise any fuel-related issues. Pre-filters and dual main filters as standard minimise fuel system failures
- Air cleaner: The large capacity forced air cleaner removes over 99% of airborne particles, reducing the risk of engine contamination and extending the cleaning and cartridge change intervals

Pin & bushing advanced technology

Highly lubricated metal is used for the boom pivot to increase the component's lifetime and lengthen greasing intervals. The bucket pivot features EM (Enhanced Macrosurface) bushings, which have a tailored surface pattern and self-lubricating coating to optimise greasing and make removal of debris more efficient. Ultra-hard wear-resistant discs & bucket pivot polymer shim increase durability even more.

Strengthened boom & arm

Finite Element Analysis has been used to calculate the best load distribution throughout the boom structure. Combined with thicker material, this means that element fatigue is limited and both reliability and component life are increased.

To better protect the base of the arm, reinforced bars have been added and the arm centre and end boss have been strengthened.

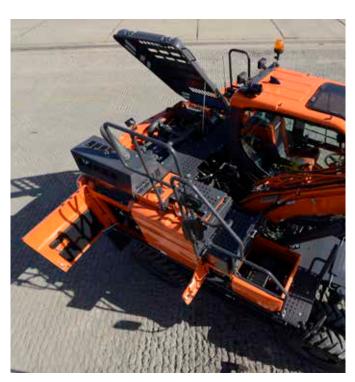

Simple maintenance with maximum uptime

Excellent service accessibility

Short maintenance operations at long intervals mean you can depend on your equipment being available on site when it's needed. Our machines are designed for simple routine maintenance, while skilled Doosan technicians are available to provide extra support, should you need it. Choose the package you need from a broad range of service agreements to get the most out of your machine. Uptime, productivity and residual value are all maximised, making these excavators an economical and rewarding choice.

Building further on the success of the Stage IIIB engines, the new Stage IV Doosan DLo6P engine has no need for a DPF filter to meet the Stage IV emissions requirements - which means no maintenance required, so more uptime!

Maintenance access made simple

- Large guard rails are installed along with anti-slip steps and plates, for safer, easier access to the whole upper structure
- The cab's air-conditioning filter is lockable and placed on the side of the cab for easy access
- A battery cut-off switch makes it easy to disconnect the battery during long-term storage
- The hour meter display can be easily checked from ground level
- Shut-off valves have been fitted on the pre-filter piping line and fuel tank drain piping to make servicing easier and prevent pollution from leakage
- Engine parts can be easily reached via the top and side panels
- For extra accessibility and servicing convenience, all filters (engine oil filter, fuel pre-filter, fuel filter and pilot filter) are located in the pump compartment

Longer service intervals

More than 99.5% of foreign particles are filtered out in oil return filters and engine oil filters - so the oil & filter change interval is longer.

Global Doosan network

With a worldwide network of Doosan dealers & Parts Distribution centres, your Doosan excavator can be serviced & maintained wherever you are.

Full solution provider

- The Doosan Telematic system is available as standard offering you all of the features for reading out vehicle operating & production parameters remotely, and providing you with complete peace of mind
- Protection+: extended warranty covering parts, travel and service (check with your local dealer)
- Maintenance contract: your dealer will support you with routine service at regular intervals
- Genuine parts: manufactured and tested to ensure they always meet the same high quality standards as the original components

SCR Tank

Connected to the ECU, sensors in tank detect low level of AdBlue® & any system malfunction

Centralised greasing points

To make maintenance easier, the greasing points have been centralised.

Technical specifications

Engine

Designed to deliver superior performance and fuel efficiency, the Doosan Stage IV diesel engine fully meets the latest emissions regulations. To optimise machine performance, the engine uses high-pressure fuel injectors, air-to-air inter-cooler and electronic engine controls. 4-Cycle Water-Cooled, Wastegate Turbocharger, Exhaust Gas Recirculation (EGR), DOC (Diesel Oxidation Catalyst), and AOC (Ammonia Oxidation Catalytic).

	DX160W-5
Model	Doosan DLo6P
No. of cylinders	6
Rated power at 2000 rpm	
(SAE J1995)	102.2 kW (137.0 HP)
(SAE J1349)	92.7 kW (132.1 HP)
Max. torque at 1400 rpm	6o kgf∙m
Idle (low - high)	800 [±10] - 2080 [±25] rpm
Piston displacement	5890 cm³
Bore × stroke	100 mm × 125 mm
Starter	24 V × 6 kW
Batteries - Alternator	2 × 12 V, 150 Ah - 24 V, 80 A
Air filter	Double element air cleaner and pre-filtered Turbo dust separator

Undercarriage

Extremely robust construction throughout - made of high-quality, durable materials, with all welded structures designed to limit stresses. Lateral chassis welded and rigidly attached to undercarriage. Heat-treated connecting pins. 10.00-20-14PR (OTR) double tyres with tyre spacer. Heavy-duty front axle with automatic or operator-controlled (on/off/auto) front axle oscillation lock.

► Front axle oscillation

DX16oW-5
± 7.94°

▶ Fluid capacities

	DX16oW-5
Fuel tank	280 l
Cooling system (radiator)	20 l
Hydraulic oil tank	102 l
Engine oil	22 l
Swing drive	31
Front axle hub	2 × 2.5 l
Rear axle hub	2 × 2.4 l
Front Axle Case	91
Rear Axle Case	11.2 l
Transmission	2.5 l
Urea tank	31.5 l

□ Hydraulic system

The e-EPOS (Electronic Power Optimising System) is the brain of the excavator - minimising fuel consumption and optimising the efficiency of the hydraulic system for all working conditions.

To harmonise the operation of the engine and the hydraulics, the e-EPOS is connected to the engine's electronic control unit (ECU) via a data transfer link.

- The hydraulic system enables independent or combined operations
- 2 travel speeds offer either increased torque or high speed
- Cross-sensing pump system for fuel savings
- Auto-deceleration system
- 4 operating modes, 4 power modes
- Flow and pressure control of auxiliary hydraulic circuits from control panel
- Computer-aided pump flow control

► Maximum system pressure

	DX160W-5
Main pumps (2)	Parallel bent-axis axial piston
Maximum flow at 2000 rpm	2 × 170 l/min
Maximum system pressure	
Work	34.3 MPa
Travel	36.3 MPa

Pumps

Pump	Type Max. flow @ 2000 rpm		Relief valve pressure	
Main (2)	Parallel, Bent-Axis, Axial piston	2 × 170 l/min	-	
Pilot	Gear	24.1 l/min	4 MPa	
Steering	Gear	35.5 l/min	18.5 MPa	
Brake	Gear	13.6 l/min	15.7 MPa	

Hydraulic cylinders

High-strength steel piston rods and cylinder bodies. Shock-absorbing mechanism fitted in all cylinders for shock-free operation and extended piston life.

Cylinders	Quantity	Bore × rod diameter × stroke (mm)
One-piece boom	2	110 × 75 × 1035
Arm, one-piece boom	1	115 × 80 × 1068
Two-piece boom upper	2	110 × 75 × 975
Two-piece boom lower	1	140 × 85 × 720
Arm, two-piece boom	1	115 × 80 × 1092
Bucket, one-piece boom	1	95 × 65 × 900
Bucket, two-piece boom	1	100 × 70 × 900
Blade	2	100 × 60 × 204
Stabilisers	2	110 × 70 × 438

Brakes

Dual multi-disc circuit with sintered metal discs for extended service life. Braking system activated by a pump and accumulator circuits. Spring-applied, hydraulically released parking brake mounted on the transmission shaft.

Component weights

Item	Weight (kg)	Remarks			
Upper structure without front	7280	With counterweight			
Undercarriage	5040	Including stabilisers/blade, front cradle and rear dozer			
Front assembly	2361				
Counterweight	2500				
One-piece boom	738	4400 mm			
One-piece boom	767	4600 mm			
Arm	370	2100 mm			
Arm	414	2500 mm			
Two-piece boom, lower	384				
Two-piece boom, upper	592				
Dozer	716				
Dozer cylinders (each)	42				
Stabilisers	926				
Stabiliser cylinders (each)	74				

■ Swing mechanism

The swing mechanism uses an axial piston motor, driving a 2-stage planetary reduction gear bathed in oil for maximum torque.

- Swing bearing: single-row, shear type ball bearing with induction hardened internal gear
- Internal gear and pinion immersed in lubricant
- Increased swing torque reduces swing time
- The swing brake for parking is activated by spring and released hydraulically

► Swing speed & torque

	DX16oW-5	
Maximum swing speed	11.4 rpm	
Maximum swing torque	3744 kgf∙m	

Drive

The wheels are driven by an axial piston engine via a two-speed powershift transmission. In addition to the two-speed powershift transmission, there is also an economy mode and a switch for the creep speed. A button makes it possible to pass from high to low in work mode.

Two travel speed ranges offer a choice between increased torque or high speed.

► Speed & traction

	DX16oW-5	
Travel speed (creep - low - high)	3.5 - 10 - 37 km/h	
Maximum traction	8.1 t	
Minimum turning radius	6.4 m	
Gradeability	62% (32°)	

Cab

ROPS cab, large and roomy interior. One-way travel pedal with FNR switch on the right joystick. Audio system with remote control, independently adjustable joystick consoles. Excellent all-round visibility, transparent roof hatch, 2-piece sliding door window, narrow and easily adjustable steering column. The removable lower front glass can be stored behind the seat. Interior lighting. The pressurised and filtered cab air is supplied by numerous vents. Climate-control provides fast defrosting and high cooling and heating performance. Viscous/spring mounted suspension cushions reduce vibrations. Heated air suspension seat with adjustable seat suspension, height, tilt, recline and forward-backward settings. Adjustable, easy to read 7 LCD colour monitor provides real-time information on machine functions and diagnostic information and is switchable to rear view camera (std) or side view camera (optional).

► Noise emission

	DX160W-5
A-weighted emission sound pressure level at the operator's position, LpAd (ISO 6396:2008)	Declared: 70 dB(A)
A-weighted sound power level, LwAd (2000/14/EC)	Guaranteed: 101 dB(A) Measured: 99 dB(A)

Note – Declared single-number noise emission values are the sum of measured values and the associated uncertainty, and they represent upper boundaries of the range of values which is likely to occur in measurements.

Doosan Buckets

4 More. More choice - More durable - More strength - More performance!

The General purpose bucket is designed for digging and re-handling soft to medium materials (e.g. materials with low wear characteristics such as top-soil, loam, coal).

The Heavy duty bucket is designed for mass excavations in dense materials such as hard packed clay, shot limestone, limited rock content and gravel.

The Severe duty bucket is designed for durability in digging compact materials like loose or blasted rock, hard packed clay and stone.

The X-treme duty bucket is designed as a long-life version of the Severe duty bucket for digging in the most abrasive

- : Rating over front.
- : Rating over side or 360°.
- 1. Lifting capacities are in compliance with ISO 10567:2007(E).
- 2. The load point is at the end of the arm.
- 3. * = The nominal loads are based on hydraulic capacity.
- 4. The nominal loads shown do not exceed 75% of tipping loads or 87% of hydraulic lifting capacity.
- ${\it 5.} \ {\it For lifting capacity with bucket, simply subtract the actual weight of the bucket from the values.}$
- 6. The configurations indicated do not necessarily reflect the standard equipment of the machine.

Lifting capacities

Standard and optional equipment

□ Engine	
Doosan DLo6P Stage IV compliant SCR EGR DOC water-cooled diesel engine	•
with Wastegate Turbocharger and air-to-air intercooler Auto-idle function	•
Auto shut-off No DPF	•
Boom and arm flow regeneration	•
Swing anti-rebound valves	•
Spare ports (valve)	•
One-touch power boost function Smart Power Control (SPC)	•
Breaker piping	•
Cylinder cushioning & contamination seals Control of auxiliary hydraulic flow and pressure from the display panel	•
Cab & Interior	
Pressurised, sound-insulated and CabSus mounted cab Heated, adjustable air suspension seat with adjustable headrest and armrest	•
Air conditioning with climate control	•
Pull-up type front window with sun roller blind and removable lower front window	•
Sliding left window Intermittent upper and lower windshield wiper	•
Rain visor	•
Rear window defroster switch Adjustable PPC wrist control levers for arm, boom, bucket and swing	•
Joysticks and pedals provide proportional control of auxiliary lines for attachments	-
Adjustable tiltable steering column	•
Pedal for auxiliary control 1 & 2 ways Jog shuttle switch	•
7" (18 cm) TFT LCD colour monitor panel	•
Attachment management system	•
Engine speed (RPM) control dial	•
Automatic travel speed 4 operating modes & 4 working modes	•
Electric horn	•
Cigarette lighter	•
Ceiling light Cup holder	•
Multiple storage compartments (e.g. document holder under seat)	•
Storage area (tools, etc.) Hot and cool box	•
Flat, spacious, easy-to-clean floor	-
Master key	•
Anti-theft protection 12 V spare power socket	•
Serial communication port for laptop PC interface	•
Remote radio ON/OFF switch	•
Loudspeakers and connections for radio MP3/USB radio or MP3/USB radio with CD player	0
Roll Over Protective Structure (ROPS)	
Boom and arm cylinder safety valves	•
Overload warning device	•
Large guard rails on upper structure and steps Rotating beacon	•
Rear-view camera	•
Punched metal anti-slip plates	•
Hydraulic safety lock lever Safety glass	•
Hammer for emergency escape	•
Right and left rear-view mirrors	•
Lockable fuel cap and covers Battery cut-off switch	•
Engine restart prevention system	•
Parking brake	•
Work lights (2 front frame, 4 front cab-mounted, 2 rear cab-mounted, 2 boom-mounted and 1 rear side)	•
Emergency engine stop switch and hydraulic pump control switch	•
FOGS cab - top and front cab guards (ISO 10262)	0
Front window upper and lower guards Side-view camera	0
Other	_
Boom: 4600 mm one-piece boom – 2500 mm arm – 2500 kg counterweight "CORE TMS" Telematic system	•
Auto shut-off fuel filler pump	•
Double element air cleaner and pre-filtered Turbo dust separator	•
Fuel pre-filter with water separator sensor Dust screen for radiator/oil cooler	•
Self-diagnostic function	•
Alternator (24 V, 80 A) - Battery (2 × 12 V, 150 Ah)	•
Hydrostatic drive with 2 speed power shift transmission Remote greasing for swing circle and work group pivot points	•
0 0 0	

Guards for work lights	•
Arms: 2100 mm (for 4600 mm one-piece boom)	
Arms: 2100 mm and 2500 mm (for 4988 mm two-piece boom)	
Booms: 4988 mm two-piece boom	
Doosan buckets: full range of GP, HD & Rock buckets	0
Doosan breakers and Doosan quick-couplers	0
lydraulic piping for crusher, quick-coupler, clamshell, tilting and rotating buckets	0
Additional filter for breaker piping	0
loating boom	0
Oouble pump flow	0
ngine coolant heater	0
Sio oil	0
utomatic lubrication system	0

utomatic lubrication system load homologation (depending on countries) Undercarriage lear parallel dozer blade ront cradle louble tyres 10-20 14PR leavy duty ZF axles with front axle oscillation lock modes (On/Off/Auto) leinforced heavy duty chassis siston rod protection of Stabiliser cylinders	
uutomatic lubrication system toad homologation (depending on countries) Undercarriage tear parallel dozer blade ront cradle touble tyres 10-20 14PR teavy duty ZF axles with front axle oscillation lock modes (On/Off/Auto) teinforced heavy duty chassis teiston rod protection of Stabiliser cylinders tockable tool box (left side)	
Automatic lubrication system toad homologation (depending on countries) Undercarriage Rear parallel dozer blade ront cradle obcuble tyres 10-20 14PR Heavy duty ZF axles with front axle oscillation lock modes (On/Off/Auto) Reinforced heavy duty chassis Piston rod protection of Stabiliser cylinders ockable tool box (left side) Rear & front chain tightening eyes	
uutomatic lubrication system load homologation (depending on countries) Undercarriage lear parallel dozer blade ront cradle louble tyres 10-20 14PR leavy duty ZF axles with front axle oscillation lock modes (On/Off/Auto) leinforced heavy duty chassis liston rod protection of Stabiliser cylinders lockable tool box (left side) leare & front chain tightening eyes lockable tool box (right side)	
uutomatic lubrication system toad homologation (depending on countries) Undercarriage tear parallel dozer blade riont cradle bouble tyres 10-20 14PR Heavy duty ZF axles with front axle oscillation lock modes (On/Off/Auto) teinforced heavy duty chassis Piston rod protection of Stabiliser cylinders ockable tool box (left side) tear & front chain tightening eyes ockable tool box (right side) ront parallel dozer blade and rear independent Stabilisers	
uutomatic lubrication system toad homologation (depending on countries) Undercarriage tear parallel dozer blade ront cradle touble tyres 10-20 14PR teavy duty ZF axles with front axle oscillation lock modes (On/Off/Auto) teinforced heavy duty chassis teiston rod protection of Stabiliser cylinders tockable tool box (left side)	

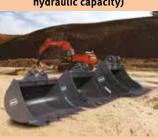

Engine coolant heater

Tool box

Double pump flow (for attachments requiring high hydraulic capacity)

Doosan buckets

Two-piece boom

Doosan breakers and quick-couplers

Some of these options may be standard in some markets. Some of these options may not be available for certain markets. Please check with your local DOOSAN dealer for more information about availability or to adapt your machine to your application needs.
